Distribution of per-circuit headroom capture rate
500 random mixed circuits, 5-12 blocks
mean = 99.00 %
median = 100.00 %
min = 37.50 %
below 100 % : 18 / 500
482 / 500 circuits = 96.4%
exactly at 100 %
sub-optimal tail (zoom)
Count (number of circuits)
Headroom capture rate (greedy saving / oracle saving), %
